

WHY SMARTSUN?

- High expertise EPC team.
- Strategic tie-up with leading module and inverter manufacturers.
- Accessories used comply with international standards and are procured from leaders on the respective segment.
- Engineering team trained in Taiwan.
- Modules come with unprecedented twenty five years output warranty.
- Extensive module range (40wp 305wp).
- Solar inverters from world No:1 manufacturers.
- Obtaining and Managing required licenses and approvals.
- Renewable energy certificate (REC) consulting.
- Smartsun Scada remote monitoring system.
- Anodized aluminum mounting structures for long life.
- Excellent after sales service and maintenance.

OUR PRODUCTS SMARTNESS

- High module efficiency, up to 15.74%
- Tested for 5400pa load capacity, can withstand heavy snowfall
- Corrosion resistant Anodised Aluminium frame
- Low iron tempered glass with high transparency improves module efficiency
- Special modules with anti-reflection glass
- Customised modules like black passivated modules, glass roof modules, BIPV modules for exterior wall cladding
- Well engineered and aesthetic module mounting frames made of anodized aluminum for longer life
- Solar tracking system to follow sun path, to improve power generation
- Intelligent space management by high module efficiency and CAD designed layout (10w/Sq.ft)
- Energy cost is sealed for next 25 years, no matter what happens to fossil fuel cost

SMART CUTTING EDGE FEATURES

Aspiring to produce sustainable source of renewable green energy and to create a promising energy adequate tomorrow, Smartsun is actively engaged into this business with quality as the top-notch priority.

- Smartsun Solar is a part of five decade old Smart Machinery group Taiwan.
- Smart Machinery group are the leading Manufactures of textile machineries and are having a huge customer base in India.
- The Company is promoted by technocrats with a wide range of experience and expertise in Electrical and mechanical industry.
- The Engineers and technicians of the Smartsun family were well trained in Taiwan in order to solve the challenge and problem they face in each projects.
- Our projects are designed in concurrence with the engineering team in Taiwan and executed carefully using the latest technologies.

- We are having strategic tie-up with the world renowned inverter and module manufacturers and all the accessories used in the project are of reputed make and complies international standards.
- The project are completed as per the commitment with adherence to the quality expectations of the customers.

Quality Policy

Smartsun is committed to deliver highest quality products by espousing the best engineering and technology practices. We believe in bringing customer focus, sustainable development and emphasize on continuous improvement in every aspect of our business.

smart energy smart world

Where the colour of light is GREEN

It is time to accelerate the development of advanced clean energy technologies in order to address the global challenges of energy security, climate change and sustainable development. Solar photovoltaic is a key technology option to realize the shift to a decarbonized energy supply and is projected to emerge as an attractive alternative source in the future. Just 1kw solar power installation cuts down about 850 kgs of Co2 emission per year.
